Gordale is very easy to find on the Chester High Road, midway between Chester and Heswall, around 7 miles from each, and around 10 miles from Birkenhead. Just look out for the brown tourist signs.

From Hoylake and Heswall, follow the A540 towards Chester. Gordale is located on the right hand side of the road, approximately 7 miles from the Heswall Glegg Arms Roundabout. Turn right into Gordale at our new traffic lights.

From the M53, leave at Junction 5 and follow the A550 towards Queensferry. Turn right on the A540 at Two Mills and follow the road. Gordale is just past WaterWorld on the left hand side.

From the M56, follow the motorway to the end at junction 16. Turn left on to the A5117, then right after a short distance, on to the A540. Gordale is just past WaterWorld on the left hand side.

Tips for a beautiful lawn - all year long

Spring March – May

Start to cut lawns at least once a week, with a high cut, gradually reducing the blade each mowing to 2cm for general lawns.

Begin feeding with a high nitrogen feed or a triple action feed, weed and moss killer if weeds and moss are a problem.

Scarify the lawn with a spring tine rake; this will remove any build up of thatch and moss.

Sow new lawns from seed or lay turf. We stock a full range of grass seed including multi-purpose, luxury, shady and the new fast acting seed for establishment.

Repair any worn or damaged patches using a lawn repair kit, or seed mixed with compost.

Summer June - August

Continue to cut lawns up to twice a week with the blade set to 2cm. Leave lawns to rest in very dry weather, or raise blade and mow without box.

Apply feed. Water to avoid any chance of scorching. Control weeds using a selective weed killer.

Thoroughly water new lawns every 2 days.

Aerate compacted lawns using a garden fork or even better still a hollow tined aerator. This will aid drainage and encourage root growth.

Autumn September – November

Reduce cutting to once a week and raise cutting height, to 4cm.

Feed with an autumn lawn feed. This will encourage root growth and prepare your lawn for all winter has to offer. Most autumn feeds also contain moss killer to tackle both problems at once.

Sow or lay new lawns, repair worn patches with seed* or new turf.

Sweep up fallen leaves. Aerate poor draining areas. Scarify. Scatter any worm casts using a Besom Broom.

Winter December – February

Keep off your lawn. Remove any weeds from the garden to stop them seeding onto the lawn.

Get your lawn mower serviced, then sit back and relax.

You can if preferred, cut your lawn once a month to keep it in tip top condition. Pick a nice day though.

*If temperature allows. New seeds will not germinate in cold snaps.
